ABOUT LENNOX INSTITUTE

Lennox Institute offers nationally accredited training which can be customised to meet your requirements. The training is usually delivered in the workplace but can also be delivered off-the-job. Most training attracts government financial support and meets the requirements of the new Apprenticeship program for trainees. At Lennox, we specialise in creating training that meets the needs of your business and adds value to your operations.

A Complete Training Service

We recognise that an important part of a successful training program is the management of the administration involved. To assist our clients we have developed:

- Customised databases to track all of the training
- Regular reporting to assist you to track grants received and payroll tax relief

Our training services include customised courses, accredited courses and a range of management courses. We understand that training is not your core business and work in partnership with different levels of management within your organization to ensure that the programs run smoothly with maximum attendance. Feedback from students and employers indicates that the training is enjoyed by students and skills are improved. Lennox trainers have extensive experience in the industry and have gained the respect and trust of our students and clients.

Courses
